

UAT Initiation & Design

Team ID	PNT2002TMID41774
Project Name	Emerging Methods For Early Forest Fire Detection
Maximum Marks	2 Marks

UAT Initiation

- UAT test approach is defined.
- Business users who would be performing this testing or identified.
- Environment are shorted out.
- Test data requirements are identified.
- Required support form all other teams are discussed and support team; identified.

The main purpose of UAT is to validate end to end business flow.It does not focus on cosmetic errors, spelling mistakes or system testing.User acceptance Testing is carried out in the separate testing environment with protection like data setup .It is kind of black box testing where two or more end users will be involved.

UAT Test Design

- Business scenarios to be validated or identified and documents.
- Relevant test data is identified.
- Scenarios are uploaded in the corresponding management tools.
- Appropriate user accesses are requested.
