

PROJECT DESIGN

PHASE II

Team ID	PNT2022TMID41774
Project Name	Emerging Methods For Early Detection of Forest fires
Maximum Mark	2 Marks

Third-Party APIs

△ The APIs we've covered so far are built into the browser, not all APIs are.

△ Many large websites and services such as google maps, twitter, Facebook, paypal, etc.

△ Provide APIs allowing developer's to make use of their data. (e.g. displaying your twitter stream on your blog) or services.

△ Third party APIs are APIs provided by third parties-- generally companies such as Facebook, twitter, or google-to allow you access their functionality via javascript and use it on your site.

△ One of the most obvious example is using mapping APIs to display custom maps on your pages.

△ This article look at the difference between browser APIs and 3rd party APIs and show s some typical usesof the latter.

Third-party API Integration
