

## Acceptance testing

Team ID	PNT2022TMID41774
Project Name	Emerging Methods For Early Detection of Forest Fires Detection
Maximum Marks	4 Marks

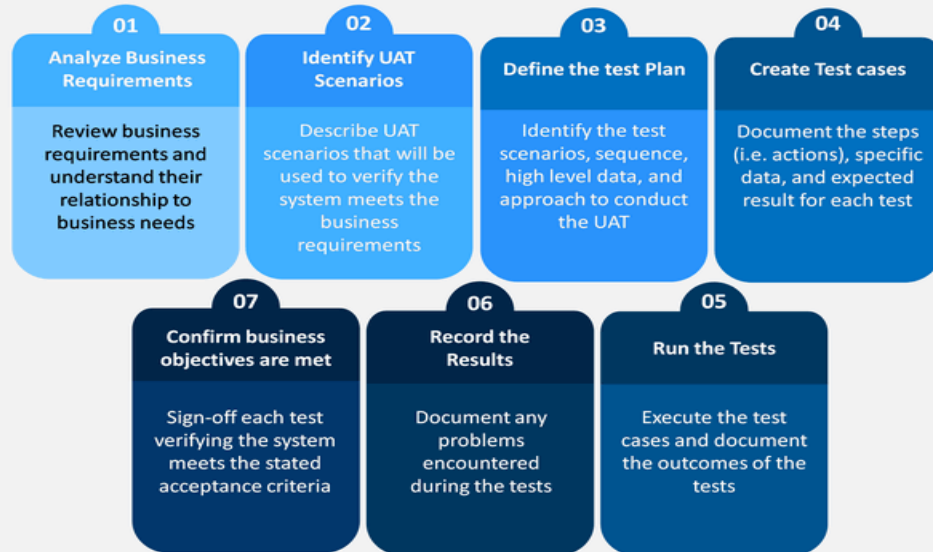

### UAT Execution and report submission:

- ❖ The User Acceptance Test Report is a document that identifies the status of Discrepancy Notices (DN) as UAT progresses.
- ❖ User Acceptance Testing (UAT), or application testing, is the final stage of any software development or change request lifecycle before go-live. It is the final stage of any development process to determine that the software does what it was designed to do in real-world situations.
- ❖ User acceptance testing (UAT), also called application testing or end-user testing, is a phase of software development in which the software is tested in the real world by its intended audience.

## USER ACCEPTANCE TESTING

### Tasks of a UAT Tester

### User Acceptance Test Report

Category	Description	DN per Category	Summary of DN Status	
Category A	E.g. critical to core functionality	# of DNs per category	No. Of Open DNs	Enter #
Category B	E.g. Critical to non-core functionality	# of DNs per category	No. Of Closed DNs	Enter #
Category C	E.g. Non critical	# of DNs per category	Total No. Of DNs	Enter #
Category D	E.g. Cosmetic	# of DNs per category	Total No. of Change Requests identified	Enter #

[Submit this report to the Customer during User Acceptance Testing. This report identifies the status of Discrepancy Notices (DN) as UAT progresses. Note that even when a DN is 'Closed', it must be recorded here to ensure that the final status of any DN is available throughout the UAT period.]
